BAYTEK® LLC

PRESS RELEASE

Baytek® LLC Risk Management Plus Program Grows in 2010

Mountain View CA, Oct 5 2010: For many companies, the prospect of dealing with Risk Management can be daunting. A few of the logistical as well as financial and non-financial challenges facing companies include: developing a plan to address risk, review of potential risk related areas and activities and review of current risk insurance coverage.

Providing assistance in this area is Baytek LLC, headquartered in Mountain View CA. Baytek, partnered with a leading law firm is adding a new approach to the Baytek Risk Management Plus (RMP) program implemented in 2009. RMP is designed to address many of the financial and non-financial risks faced by companies today. Baytek along with one of their partner organizations offers assistance with such services as risk analysis, insurance policy reviews, asset protection, outsourcing review and contract review just to name a few.

In addition, the firm provides a variety of services to ease the day-to-day burden of risk management. These include assistance with design and review of company accounting data, software, policies, procedures and compliancy as well as staff employment records review. Risk relative to the current economic climate over the past two years has increased the demand for Risk Management Plus.

A unique aspect of Baytek's new Risk Management Plus service is the breadth of non-financial services the firm offers. Non-financial services include asset and intellectual property planning.

"Baytek is dedicated to providing the highest quality of products, services, training and technology to our clients. We are dedicated to retaining customer loyalty through learning relationships with our clients. Offering accounting and CRM products by Sage Software has enabled us to become a trusted and valued partner in the eyes of our clients and our new Risk Management Plus program builds on that trusted relationship", states Judy Thornell. Ms. Thornell stated "Baytek is dedicated to retaining customer loyalty through learning relationships with their clients".
